 - Press Release
- Upcoming Mellon LionShare Project Retreat

LionShare Overview

- Mellon Grant Objectives
 - LionShare Components
 - LionShare Client
 - LionShare PeerServer
 - LionShare Gateway
 - Federated Authentication
 - Connecting to other repositories

LionShare “Client”

- It's not really a “client”
- Peer or Gnutella Servant
- Search, Retrieve, Share, Post, Organize

LionShare PeerServer

- Allows users to share files on the LionShare network without having their clients connected
- Users can share files+metadata or just metadata
- www admin interface
- Optional support for user web browser access, “pub” folder

LionShare Gateway

Connects other repositories and networks to the LionShare network

OKI Digital Repository OSID to connect to other repositories
